DEVOPS ENGINEER & NETWORK

PROFESSIONAL SUMMARY

Junior DevOps Engineer & Network with a security-first mindset. Hands-on experience designing a 3-tier campus network for 700+ users, full-stack web development with deployment, and commercial cybersecurity auditing (ISO 27001, VAPT). Certified across 5 Cisco CCNA-track courses. Currently delivering an international project for a German client (Luxora). Proficient in Docker, Docker Compose, Python, Linux, Git, SQL, Supabase & database migrations, and core DevOps practices (CI/CD).

TECHNICAL SKILLS

Networking: Cisco IOS, Routing & Switching (L2/L3), VLANs, VPN, TCP/IP, 3-Tier Network Design.
Security: Penetration Testing (VAPT), ISO 27001, WPA2/WPA3 Analysis, Kali Linux, Risk Assessment.
DevOps: Docker, Linux Admin & Hardening, Nginx, Git, Bash, Akamai/Linode, Vercel, Grafana, Prometheus, K8s.
Dev: Python, SQL, JavaScript, C++, HTML/CSS, Next.js, React, Java, PostgreSQL.
Expanding: Terraform, Azure/AWS, CI/CD Pipelines.

EDUCATION & CERTIFICATIONS

B.Sc. Information Systems & Technologies (educational program - IoT Software Technologies) - Taras Shevchenko National University of Kyiv | 2024–present | GPA 90+
Certifications: CCNA: Introduction to Networks / Switching, Routing, and Wireless Essentials / Cybersecurity Essentials / Enterprise Networking, Security, and Automation. Google.org & Hackathon 2025: Fundamentals of Cybersecurity for Small Organizations. Oracle - Database Foundations
In progress: Mate Academy DevOps Track

PROJECTS & EXPERIENCE

Campus Network Design & Deployment | KNU / Personal Project | 2026

- Designed and built a 3-tier hierarchical network (Core / Distribution / Access) from scratch for 700+ users
- Implemented VLANs, inter-VLAN routing, STP, redundant uplinks, and access control policies
- Applied network security best practices: port security, DHCP snooping, DAI, ACLs, and WPA3 wireless
- Full physical & logical documentation, IP addressing plan, and post-deployment performance monitoring

Full-Stack Web Project + Deployment | Luxora (Germany) — Part-time | 2026 – present

- Developing a business website for a German client: frontend (HTML/CSS/JS/Next.js), backend (Python), and database layer (Supabase)
- Containerized the application with Docker; deployed and maintained on a Linux VPS with Nginx reverse proxy
- Handling ongoing support, updates, and performance monitoring for the production environment

Cybersecurity Audit & Penetration Testing | Business Continuity Solutions LLC | 2025

- Performed ISO 27001-based security audit and full VAPT (internal + external) for a commercial client
- Analyzed WPA2/WPA3 vulnerabilities; delivered prioritized remediation report

Efficiency Unit Lead | KNU Faculty Student Parliament | 2025 – present

- Built KPI frameworks, analytical dashboards, and reporting systems for cross-department performance tracking
