## PROFILE

Junior DevOps & Network Engineer and third-year Information Systems and Technologies student with a security-first mindset. Hands-on experience in designing a 3-tier campus network for 700+ users, containerising and deploying a production website for a German client, and commercial security auditing (ISO 27001, VAPT). Proficient in Docker, Linux, Nginx, Cisco IOS, Python and SQL; Cisco Networking Academy certified (CCNA track). Eager to bring end-to-end ownership and a roll-up-your-sleeves attitude to a DevOps or network team.

## EXPERIENCE & PROJECTS

**Full-Stack Development & Deployment** | Luxora (Germany), part-time **2026 – present**

- Develop a business website for a German client: Next.js, HTML/CSS and JavaScript frontend, Python backend and a Supabase (PostgreSQL) database with migrations.
- Containerise the application with Docker and run it on a Linux VPS behind an Nginx reverse proxy.
- Provide ongoing support, updates and performance monitoring of the production environment.

**Campus Network Design & Deployment** | KNU / personal project **2026**

- Designed and built a 3-tier hierarchical network (core / distribution / access) from scratch for 700+ users.
- Implemented VLANs, inter-VLAN routing, STP and redundant uplinks so that the network stays available when a single link fails.
- Secured the network with port security, DHCP snooping, DAI, ACLs and WPA3 wireless.
- Produced full physical and logical documentation and an IP addressing plan; monitored performance after deployment.

**Efficiency Unit Lead** | KNU Faculty Student Parliament **2025 – present**

- Build KPI frameworks, analytical dashboards and reporting systems to track the performance of cross-department work.

**Cybersecurity Audit & Penetration Testing** | Business Continuity Solutions LLC **2025**

- Performed an ISO 27001-based security audit and a full internal and external VAPT for a commercial client.
- Analysed WPA2/WPA3 wireless vulnerabilities and delivered a prioritised remediation report.

## TECHNICAL SKILLS

**Networking:** Cisco IOS, routing & switching (L2/L3), VLANs, STP, ACLs, VPN, TCP/IP, 3-tier network design
**DevOps:** Docker, Docker Compose, Linux administration & hardening, Nginx, Git, Bash, Grafana, Prometheus, Kubernetes (K8s), Akamai/Linode, Vercel
**Security:** Penetration testing (VAPT), ISO 27001, WPA2/WPA3 analysis, Kali Linux, risk assessment
**Development:** Python, SQL, PostgreSQL, Supabase, JavaScript, Next.js, React, HTML/CSS, C++, Java
**Currently learning:** Terraform, AWS / Azure, CI/CD pipelines

## EDUCATION & CERTIFICATIONS

**B.Sc. in Information Systems and Technologies (programme: IoT Software Technologies)**
Taras Shevchenko National University of Kyiv · 2024 – present (expected graduation: 2028) · GPA 90+/100

- Cisco Networking Academy: CCNA: Introduction to Networks; CCNA: Switching, Routing, and Wireless Essentials; CCNA: Enterprise Networking, Security, and Automation; Cybersecurity Essentials
- Google.org & Hackathon 2025: Fundamentals of Cybersecurity for Small Organizations
- Oracle: Database Foundations
- In progress: Mate Academy DevOps track

## LANGUAGES

**Ukrainian:** native • **English:** B1 (Intermediate)
